DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The rowhouse is three stories high with building and foundation walls laid in common bond and a flat roof. The first story facade is two bays wide with the bay to the left housing a flat wood garage door and the bay to the right housing a half arched aperture, now boarded, for a window. The two elements are encased in a painted wood storefront. The second and third story facades are each punctuated by three half arched apertures. Those on the second story facade are boarded over. Presumably they were hung in the same way as those windows punctuating the third story facade, that is, with four over four lights. Both sets of windows have wood sills and decorative brick window hood. The wood cornice surmounting the building facade is embellished with extra molding and a pierced wood sill and supported by four brackets.

STATEMENT OF SIGNIFICANCE

The 1500 block of Myrtle Avenue included houses of a variety of styles and sizes. Some were very ornately decorated, for example the window hoods of #1533. Others were simple and typical of housing in the area (#1531). The differing treatments of cornices, door and window lintels, and window sills provided a diversity along the streetscape. This block was razed c.1976.
